Attn: Nigel Robinson, Project Officer

Re: Millington, Great Swamp, White Bridge Road and New Vernon Road Sites

Dear Mr. Robinson:

In response to EPA's comments dated March 1986, I have enclosed two copies of the updated "Draft Site Operations Plan" which contains revisions to the aquatic impact assessment on pages 2-29 to 2-31. The appendices have not been enclosed since you already received two copies of them on April 9, 1986. The entire Site Operations Plan will be resubmitted once the aquatic impact assessment has been approved. Also enclosed is performance evaluation information for Princeton Testing Laboratories who will be performing our asbestos analyses.

Should you have any further questions regarding this new submittal, please feel free to call Thomas Morahan or myself at (212) 840-3990.

Sincerely,

FRED C. HART ASSOCIATES, INC.
